

FOR Every Exam (It may be Appsc (G1, G2.....SI, Dsc),  
TGPSC (G1, G2, G3.....), UPSC, Banking (future - Scope).

We have 2 SOURCES of truth to exactly "Capture the exam Pattern" and how a Particular Public Service Commission is "framing the Question Paper" (Weightage, depth, interlinking two different topics and framing the questions, etc... etc...)

What we can say now?

- ① Syllabus (Tells us the scope i.e.. Where they will focus)
- ② PYQS (Tells us  $\rightarrow$  Where? How? Which? - Section/topic the Board actually focusing)  
 $\rightarrow$  (Outcome of the Exam Board Mindset).

STEP 1: "What we actually have & how to utilize them with 100% efficiency."

## ① Regarding 'Syllabus'

- Understand the scope and depth of Syllabus.
- Divide and Rule: Breakdown the Syllabus in such a way that, we can simply handle the topics just like "we blow the ash from our hands".
- Breakdown Must → Be Clear
  - Make easier to Under
  - No Confusions
  - Common topics/Sections between different Exam Stages (pre, Mains...)
  - Any Better techniques from your end (always accepted).

Note: Not even a single topic must be left behind.

## ② Regarding PYQ's

### → Breakdown & Deep Analysis

(i) Which topics they are Picking

(ii) How they are Picking

(iii) Why they are Picking

→ Static Questions — ( i, ii, iii )

→ Dynamic Questions — ( Apply → i, ii, iii )

→ Current Affairs + Static ( Apply → i, ii, iii )

→ General Knowledge ( Apply → " )

→ Government Schemes ( Apply → " )

→ Miscellaneous Questions ( Apply → " )

→ Any Proactive ideas are always Welcome.

## STEP 2: CONSOLIDATING Syllabus & PQRS

→ How we can Consolidate the data and use that for achieving  $\approx 100\%$  Predicting the Exam Question through Content Preparation and Mock Tests.

## STEP 3: COURSE Preparation + Mocks

→ Content must be Prepared with Well Structured format, Crispy, all information must be Captured, Noised Content must be eliminated, Content Should not be lengthy as it may create lazyness, Boring, deviation etc... for the Students / learner.

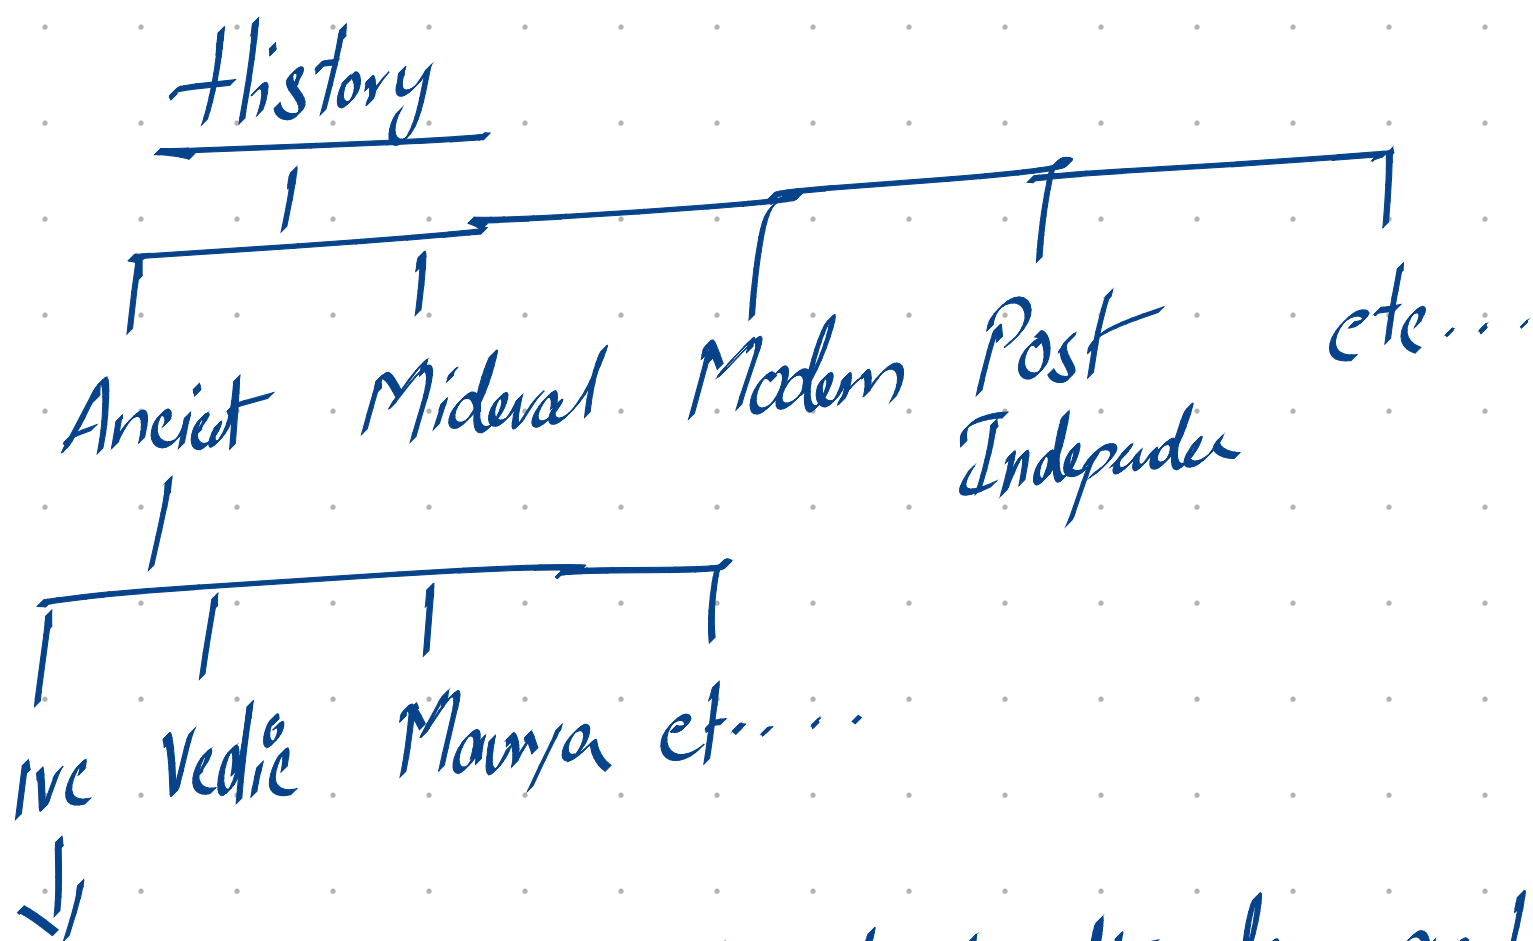

Resources: (i) Secondary Standard (6-10<sup>th</sup>, 11<sup>th</sup>, 12<sup>th</sup>)

(ii) Standard Books like: Polity - Laxmikanth,

Geography - Gc leonge, History - RS Sharma etc...

(iii) Government Reports, PIB, Ministry Websites etc....)

Content Categories & Sub-Categories (Planning must be done according to the Syllabus).

↓  
Content (Notes → given by Claude after deep analysis).

Similarly for other Categories like Polity, Economy, Ap-His, Ap-Polity, Taps-His, Current Affairs....

→ Every Course will have Content + Quiz. (Paid / Free)

Example: I've (Content given by Claude Anthropic)  
+

Mini-Mock (Questions generated from the same  
Content in I've)

Step 4. TEST-SERIES [Prediction Rate must Reach 100%]

→ Topic-wise (I've) (Multiple Tests)

→ Section-wise (Ancient India) ( " )

→ Subject-wise (History) ( " )

→ Course-wise (FLT Series) ( " )  
+  
Grand Mock)

Note: Strictly follow Syllabus & PYQs to Predict @ 100%

## Step 5: Paid Courses & Subscriptions

→ Once the Course & Test are Created we will distribute & Monetize them.

Note: Regarding the Current Affairs i have already gave my instructions we will follow that.
